

PRO CARTON
PACKAGING FOR
A BETTER WORLD

cottonone

This package is developed considering difficulties that people have while trying to take one cotton pad, they end up mostly taking a few at the same time. This package provides you a great convenience. Thanks to the slope inside the box, the vertically placed cotton pads come out one by one when you pull them from the hole. Also, it is an eco-friendly package which made of carton and one piece instead of plastic.
